DETAILED ACTION

Election/Restrictions

This application appears to disclose and claim more than one invention and/or species of a generic invention. Therefore, a restriction and/or an election of species requirement under appropriate regulations of the USPTO would be proper in this application.

Applicant may have anticipated that such a requirement would be made when the claims were prepared. Therefore, he may already be aware of how such plural inventions and/or species would properly be grouped for restriction purposes.

In order to save time for the Office, applicant is requested to provide a proposed grouping of the claimed inventions and/or species and to make a tentative election of a single invention and/or species based on the practice outlined in MPEP sections 806-809. Applicant's grouping of the claims or species and tentative election will be considered by the examiner in formulating his requirement. If appropriate, it may be incorporated without change in a formal written requirement. Applicant may reserve his right to traverse the requirement.

Within each related invention grouping, a complete election of species should include an identification of those figures or species to which claims are restricted, a listing of any claims readable thereon, an identification of any generic claims, and an election of a single species to which prosecution will be restricted if no generic claim is finally held to be allowable.

Upon the allowance of the generic claims applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. 1.141.

Applicant is advised that, while his cooperation is voluntary and any election is tentative, some response must be filed within the time set for response to avoid abandonment.
